

Faceless Video Project — Kickoff Kit

Everything to launch modern-fintech faceless videos and make video #1. Take this to a new Claude Code project.

0 · The channel (real numbers)

1,140	69	~108	~6 min	Jan 2026
subscribers	videos	avg views	long-form	last upload (dormant)

AI Finance Toolkit · @aifinancetoolkit · channel ID UCjnWDpf_JbGUVp7man8_ZFw · GB / English · Investing (AI Investing, Stock Analysis, Strategies). Positioning: *daily market recaps & weekly AI-driven investing deep dives; transparent, data-backed*. Same pattern as OrigineX — good positioning, too many low-effort uploads, weak packaging. **Fix = fewer, sharper, data-driven videos with strong titles/thumbnails and a clean look.**

1 · Kickoff prompt (paste as your FIRST message in the new project)

"Set up a faceless finance-video pipeline for my YouTube channel **AI Finance Toolkit** (@aifinancetoolkit, UCjnWDpf_JbGUVp7man8_ZFw, GB/English). Style = **modern fintech** (charts, tickers, big-number stat cards, clean UI — NOT cinematic history). Narrator = **my cloned voice** (vidIQ custom voice 'Joe OGX', voiceId JKDjSisy3uHa5eqQYalW). Three pillars: my portfolio journey, investment education, market breakdowns — all UK-compliant (educational, not financial advice). First: build the youtube-finance-video skill from the spec, then make video #1 on a chosen idea — research → scored title+thumbnail → script → my-voice VO → motion-graphic charts/cards + a little b-roll → assemble → show me before upload."

Connect the same accounts: vidIQ · Highfield (Higgsfield) · Gmail · Google Drive · GitHub. The Joe OGX voice already lives in the vidIQ voice library.

2 · Reuse what already works

Copy the proven OrigineX skill and fork it:

```
cp -r <origineX repo>/.claude/skills/youtube-animated-doc .claude/skills/youtube-finance-video
```

Keep the mechanics (already cost-tuned):

- **vidiq_motion_graphics** → animated charts, tickers, count-up stat cards, comparison cards (the cheap backbone of finance video).
- **vidiq_voiceover_generate** with voiceId JKDjSisy3uHa5eqQYalW (Joe OGX), chunk ≤ 5,000 chars.
- **Highfield generate_image / generate_video** for rationed b-roll — preflight with get_cost:true.
- **vidiq_compose** for Ken Burns + overlays; stitch the final locally with ffmpeg (imageio-ffmpeg, concat -c copy) — Higgsfield import caps at 50 MB.
- vidIQ title/thumbnail scoring; review-before-upload (nothing publishes without your OK).

3 · Modern-fintech house style (LOCK THIS)

	#0b0e14 charcoal / navy bg
	#00e08a electric green — up / positive / brand
	#2f6bff electric blue — neutral / accent
	#e0413f red — down-moves

- **Type:** clean geometric sans (Inter / Söhne feel), heavy weights for big numbers.

- **Motion:** animated line charts, bar races, count-up big numbers, progress bars, ticker strips, glassmorphism cards, subtle dot-grid background.
- **B-roll suffix:** "sleek modern fintech, dark UI aesthetic, electric green and blue accents, clean, high-tech, 16:9."
- **Pace:** a data point every 3–6s. Lower-third source citations on every stat.

4 · Content plan — 3 pillars + 12 starter ideas

JOURNEY (lead)	EDUCATION	MARKET BREAKDOWNS
1. I Let AI Pick My Portfolio for 30 Days — Real P&L 2. My Road to £1M: Month 1 (Real T212 Numbers) 3. £500/Month Into an AI-Ranked Portfolio	4. Index Funds vs AI-Managed: What UK Investors Should Know 5. The ISA Mistake Costing You Thousands 6. Compounding, Explained in 6 Minutes 7. 5 AI Tools That Do Your Research	8. What the Fed Just Did — For Your Portfolio 9. Nvidia's Earnings, Decoded by AI 10. Is the S&P Overvalued? The Data 11. Gold vs Bitcoin vs Stocks 2026 12. Weekly Market Recap (AI Deep Dive)

Real data: for journey videos, pull your actual figures with the existing portfolio-command-centre skill (Trading 212 CSV). Verify every number before it hits a card — accuracy is the brand. **Start with #1 or #2** — the journey hook is the strongest relaunch.

5 · UK compliance (MANDATORY — bake into every video)

Educational only — not financial advice. Your capital is at risk. Past performance does not guarantee future results.

- Show the disclaimer on-screen (early), in the description, and in a pinned comment.
- No guaranteed-return claims, no "buy this now" / personal recommendations — keep it general and educational.
- Cite sources on-screen for every stat; prefer primary data (filings, central banks, index providers).

6 · Cost, cadence & first-session checklist

- **Cost:** ~120–250 credits/video (finance leans on cheap motion-graphics, little AI video). Keep get_cost preflights + "stop if a step >150 credits".
- **Cadence:** 6–9 min long-form, 1–2/week to relaunch + optional 1 Short/week cut from each long-form. Score title+thumbnail first.
- **Checklist:** connect tools → fork skill to youtube-finance-video (paste §3 style + §5 compliance) → confirm Joe OGX voice (vidiq_voiceover_list_voices, isCustom:true) → pull channel context → make video #1 → review → upload unlisted → public on approval.
